

We have changed many things in the new price book, not just the new prices and the new look.

- The **Tapered Leg** is now called the **ESSEX** with a new product code: **LS2E** (for example)
- The **Regency** has a new product code: **WMREG**
- The **Apex** has new product codes: **WMAC** (with collars) & **WMA** (NO collars)
- The **Ball Foot** is no longer **Split Diameter** by default. **Split Diameter** is now an option with the product code: **SD**
- The product code to specify **No Rear Risers** is now: **NR** - instead of: /c
- The **Original** shelf support is now called the **RAIL SUPPORT** with the new product code of **SS2R** (for example)

There are several more product code changes, all of which are listed in the new Palmer Catalog & Price Guide 2018

As always, our customer service team is here to help you with any questions you might have.
